

Nama: Septian Vieri

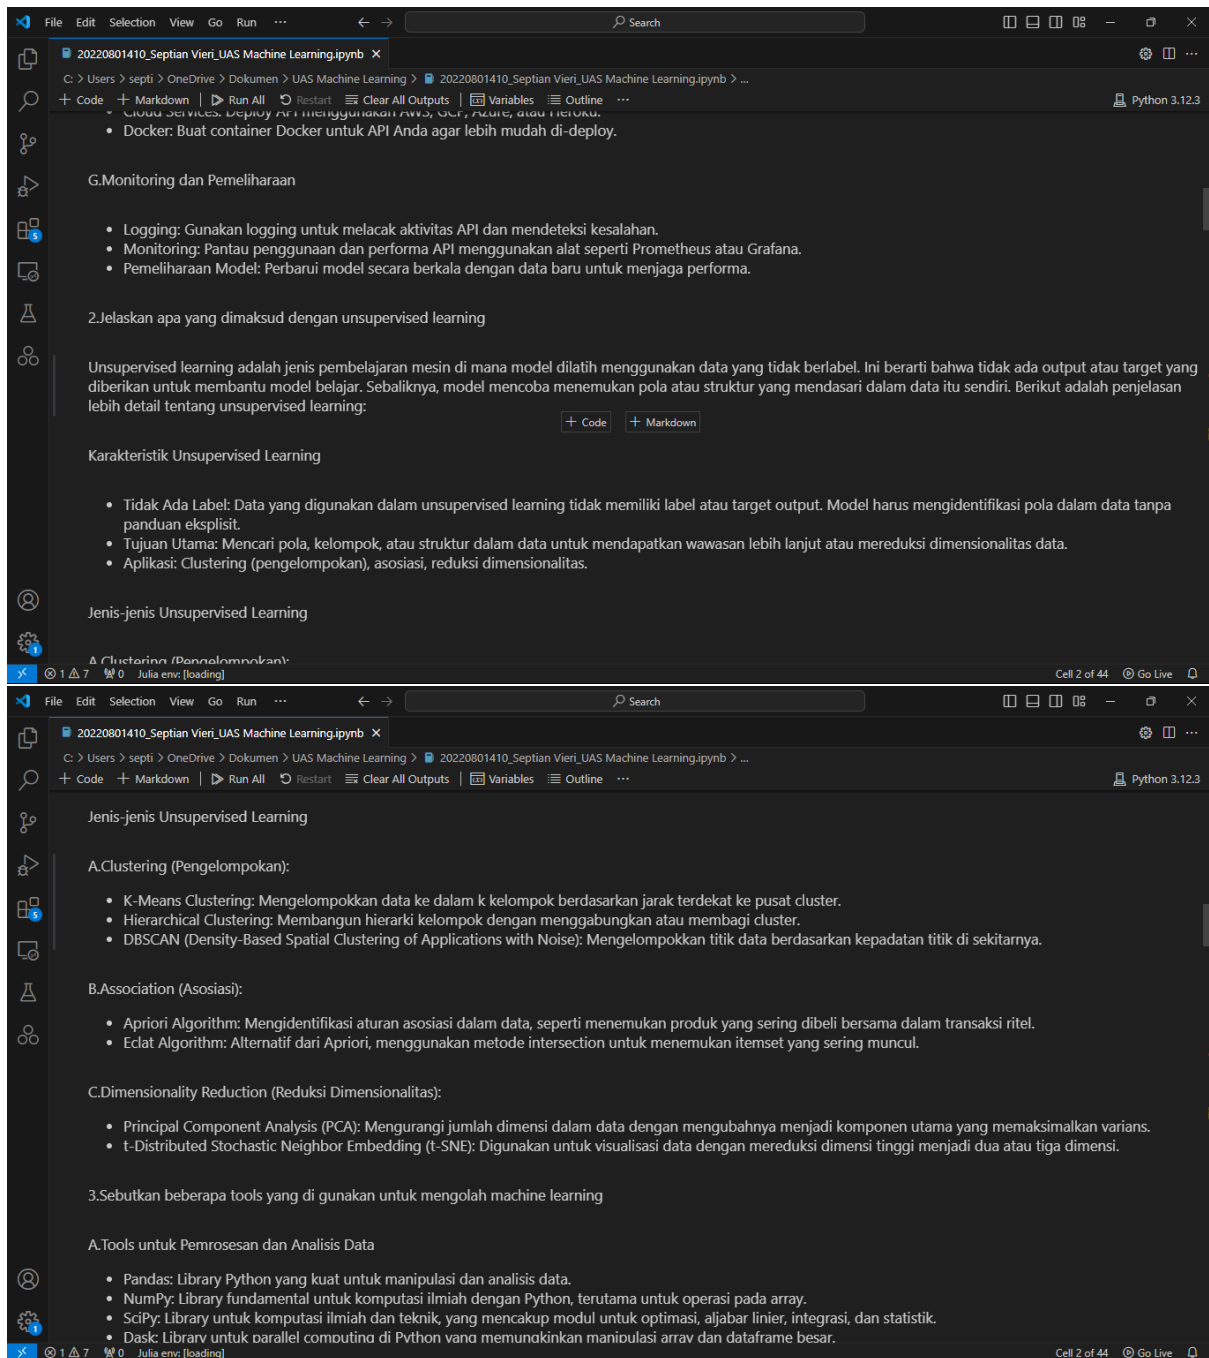

NIM: 20220801410

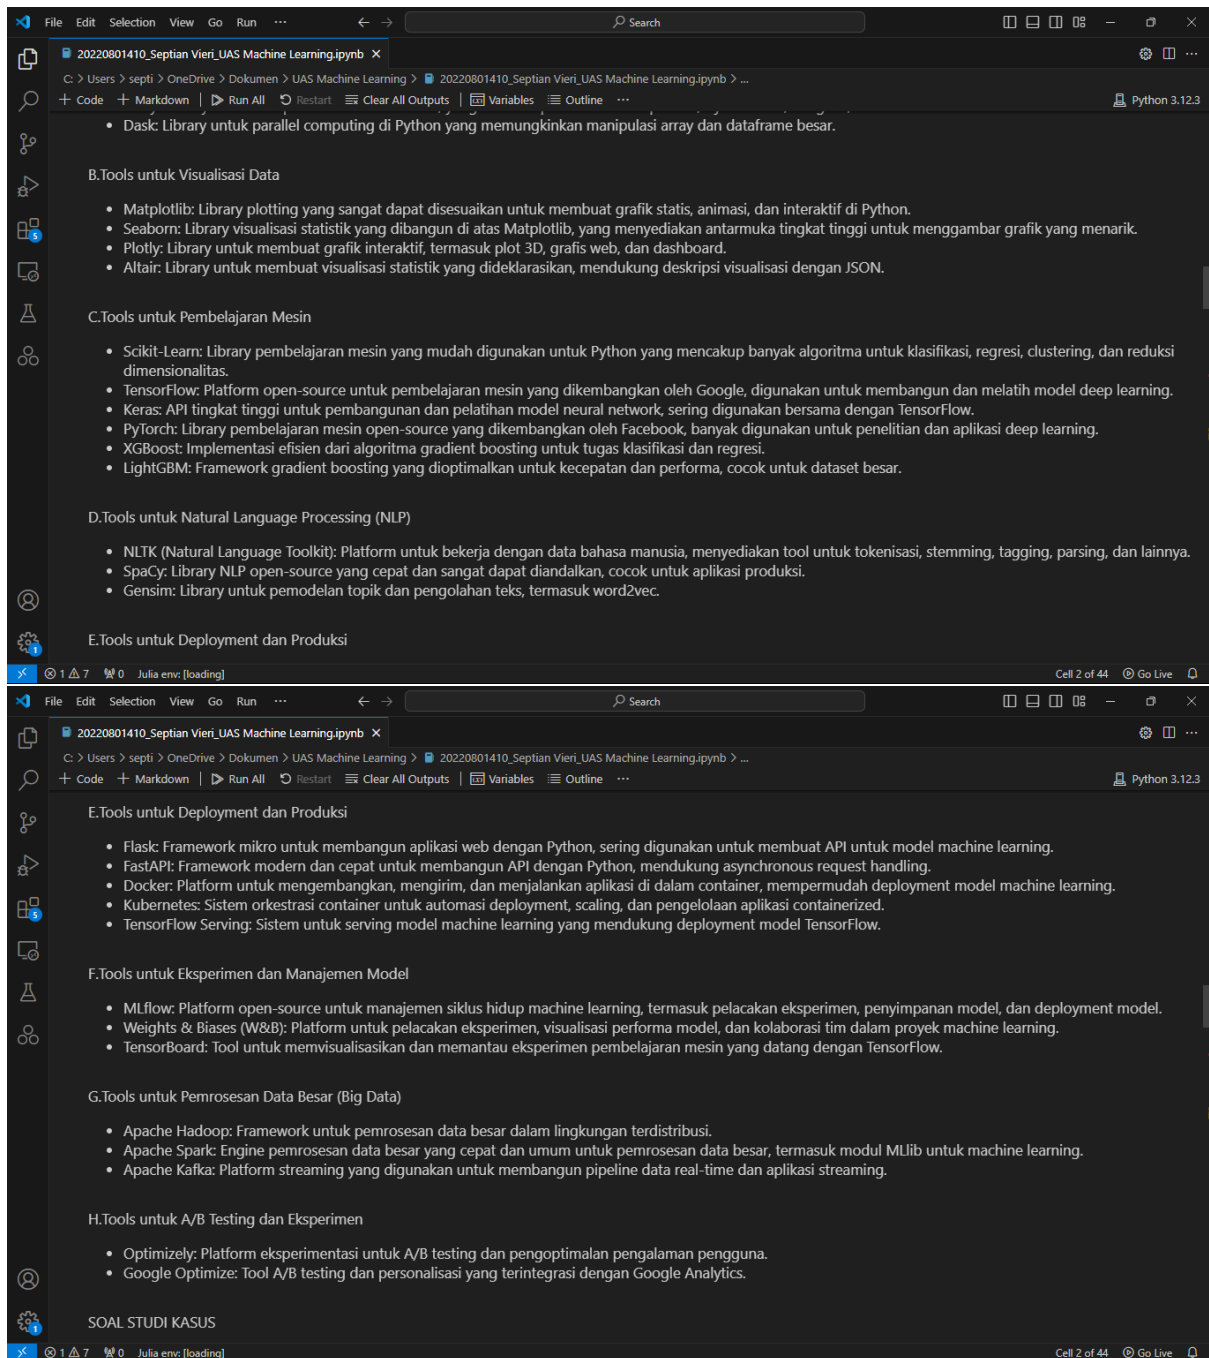

UAS Machine Learning

The screenshot displays a Jupyter Notebook interface with a dark theme. The top bar shows the file name '20220801410_Septian Vieri_UAS Machine Learning.ipynb' and the Python version 'Python 3.12.3'. The left sidebar contains a table of contents with the following items:

- SEPTIAN VIERI
- 20220801410
- UAS Machine Learning
- SOAL ESSAY
- 1.Jelaskan bagaimana memanfaatkan Machine Learning untuk Call API
- A. Menyiapkan Lingkungan Pengembangan
 - Bahasa Pemrograman: Python adalah pilihan umum untuk ML.
 - Perpustakaan ML: scikit-learn, TensorFlow, atau PyTorch.
 - Framework Web: Flask, FastAPI, atau Django.
- B. Mengumpulkan dan Mempersiapkan Data
 - Data Sumber: Database, API eksternal, file CSV, atau data mentah lainnya.
 - Pembersihan Data: Menghapus duplikasi, mengisi nilai yang hilang, normalisasi data.
 - Feature Engineering: Membuat fitur baru yang dapat meningkatkan performa model.
- C. Melatih Model Machine Learning
 - Memilih Algoritma yang Tepat: Regresi untuk prediksi nilai kontinu, klasifikasi untuk kategori, clustering untuk pengelompokan data, dsb.
 - Pipeline Data: Menggunakan pipeline untuk pemrosesan data dan pelatihan model secara berurutan.
 - Evaluasi Model: Menggunakan cross-validation dan berbagai metrik evaluasi untuk mengukur performa model.
- D. Menggunakan dan Menguji API
 - Deploy API: Deploy API ke server atau layanan cloud seperti AWS, Heroku, atau Google Cloud.
 - Menggunakan API: Aplikasi klien dapat mengirim permintaan HTTP POST ke endpoint API dengan data yang diperlukan dan menerima hasil prediksi.
- E. Monitoring dan Pemeliharaan
 - Monitoring: Pantau performa API dan model secara terus-menerus untuk memastikan mereka berjalan dengan baik dan memberikan hasil yang akurat.
 - Pemeliharaan: Perbarui model secara berkala dengan data baru untuk meningkatkan akurasi dan menangani perubahan dalam pola data.
- F.Deployment
 - Cloud Services: Deploy API menggunakan AWS, GCP, Azure, atau Heroku.
 - Docker: Buat container Docker untuk API Anda agar lebih mudah di-deploy.

The main content area shows the first two sections of the document, 'A. Menyiapkan Lingkungan Pengembangan' and 'B. Mengumpulkan dan Mempersiapkan Data', each followed by a bulleted list of key concepts and tools in machine learning.

SOAL STUDI KASUS

Periksalah nim anda misalkan nim anda adalah 20190801067. Silahkan cek 2 digit terakhir apakah berakhir genap atau ganjil, karena disini berakhir angka 67 dan masuk kategori ganjil maka anda mengerjakan soal ganjil. Kumpulkan juga hasil running dan penjelasan terkait step yang dilakukan dalam pengolahan text tersebut.

Soal untuk NIM Genap

Dengan menggunakan Jupyter Notebook lakukan pengolahan text dari url berikut red.djambred.my.id/uas-nim-genap.txt olah text tersebut sehingga dapat mengeluarkan hasil wordcloud, barplot frekuensi kata yang sering digunakan, plot terkait sentiment feel text tersebut.
